📁 PROJECTS

AIRLINE RESERVATION SYSTEM

> These are the systems that allow an airline to sell the inventory(seats).

> It helps the customers to search the availability and prices of various airline tickets ,along with the different packages available with the reservations.

E-COMMERCE SYSTEM

> The project also finds the path which will take least time for delivery of product considering 3 factors weather,traffic and distance.

> It is also used to recommend products based on purchase.
